

# ATV BAG / Big

The larger of the two ATV/Quad bags is designed for the tail rack of a large work ATV. Equipped with 2 side compartments and a central compartment, one finds sufficient room in each individual bag while navigating the most intensive terrain. The top flap adds an extra layer of protection against rain or water splashing in. The center section works like an extension of the seat, allowing plenty of room for passengers. The 6-Point attachment system keeps the bag secure in the most extreme conditions.

Dimensions: 93 x 45 cm

**Includes:**

- ATV bag with main and side compartments
- 6 lateral bag reinforcements
- Scratch resistant film

**Bottle holder**

**Main pocket**
