

NEW

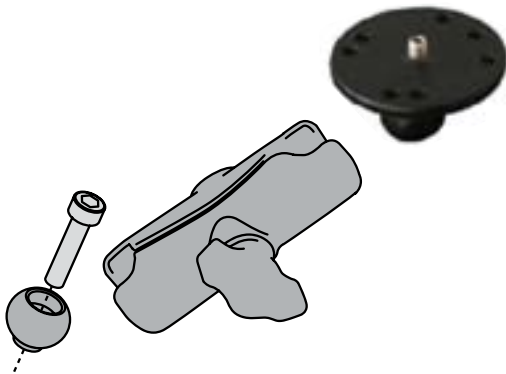

The universal Ball-Holder can be used with almost any metric M8 thread on the motorcycle. The two basic models allow the attachment of a Navigation-Systems or cameras to the bike.

For the Garmin Street Pilot & Quest a RAM-Mount adapter is required.

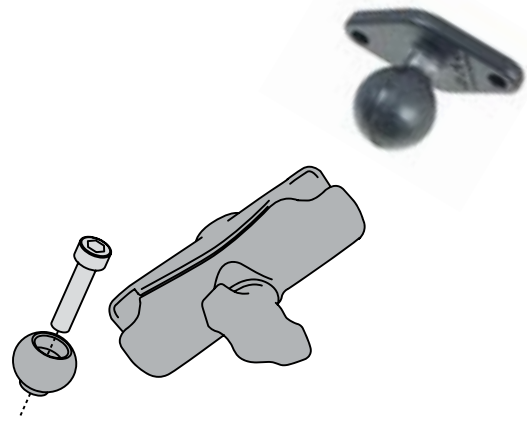

Camera Ball Mounting Kit

Standard metric M8 screw can be mounted to the motorcycle.
Standard 1/4-20 thread works with many cameras.

GPS Ball Mount Kit

Can be used alone for use with TomTom Rider or can be used together with the products listed below to mount other devices.

RAM Camera Mount

RAM Extension arm

Cradle for Garmin Street Pilot Series

GPS Cradle for Garmin Quest
